E-Gurukool
Presents
"S.T.A.R.S"
School Transport and Arrival Reporting System

E-GURUKOOL
Complete Academic Institution Management System

About S.T.A.R.S:

E-Gurukool is proud to present S.T.A.R.S - a safe and innovative method of providing school transport solutions. Under this novel model, E-Gurukool would tie up with the school and offer vehicle tracking solutions and bus arrival alerts for parents. Both the school and the students along with their parents have a multitude of benefits to gain from the solution. S.T.A.R.S is just one more step in our relentless efforts to assist schools in providing excellent education and state of the art facilities for their students.

About E-Gurukool:

E-Gurukool is a web-based management system which is designed to meet all the needs of an educational institution. It's functionally user-friendly and graphically rich interface enables an effective and convenient supervision of all the institute's activities. The organization's administrative capabilities are greatly enhanced by automation of daily functions. For information about more exciting features like S.T.A.R.S, please visit our website at www.e-gurukool.com.

Benefits for Parents:

Most parents are unsure about the arrival of school bus on a daily basis. This leaves students and parents arriving at the boarding point well ahead of time and waiting for the bus, exposing them to the hot and polluted climate in our cities. Parents are also unsure of any delays in arrival of school buses. With our current solution, parents would be able to:

- Receive SMS alerts at a specified time before bus arrival

- Track school bus position at any time

- Receive delay alerts

- Call our customer care for bus location

- Receive tentative time of arrival of bus

- Potentially eliminate chances of untoward incidents like mingling with strangers, etc.

- Get all transport related information

- Eliminate chances of missing the school bus and hence improve attendance

- Need not wait in adverse weather conditions

Benefits for the School:

Apart from offering high quality education, every school aims to provide the best care for its students. Considering the current traffic conditions, providing safe, convenient and efficient transportation to students has become a key priority for schools. Our solution aims to contribute to this goal by providing the following benefits to the school:

- Provide value added services for parents

- Provide safe and secure transportation

- Send delay alerts to parents

- Monitor vehicles

- Monitor route deviations, over speeding, mileage, etc.

- Increase satisfaction in the parent community

- Increase goodwill by word of mouth

- Optional routing solutions to save fuel and transport costs

- Decrease human resource allocation for transportation

- Assess driver performance and/or carelessness

Parents and children waiting too long?
Nervous about your student's safety?
Want to keep parents informed?
Unsure of bus location?
Want to monitor rash driving?
Want to locate your vehicle in an emergency?
Need to monitor fuel, mileage?

Presenting

"S.T.A.R.S"

Ensure safe and convenient travel
for your little stars

'No more long waits for the school bus'

'Notify parents of bus delays'

'Automatic bus arrival notifications'

'Know the exact location of your bus'
