

E-GURUKOOL

Complete Academic Institution Management System

[A Product of SreeGo]

What is E-Gurukool?

E-Gurukool is a web-based management system which is designed to meet all the needs of an educational institution. Through its various modules, all the institute's activities can be more effectively and conveniently managed in a functionally user-friendly and graphically rich interface. The organization's administrative capabilities are also greatly enhanced by automation of its daily functions. In addition, E-Gurukool's state of the art data processing centers generate exceptional reports in both graphic and spreadsheet formats from the numerous terabytes of information available. Furthermore, E-Gurukool can be seamlessly integrated with various hardware products such as access systems for time and attendance, and vehicle tracking systems for school buses.

E-Gurukool acts as the hub for all interactions among administrators, staff, students and parents.

The Power of Customizations:

At E-Gurukool, we firmly believe that no two schools are the same and therefore, neither can the application being used by them. By offering a completely customized solution to suit your institute's specific needs, we effectively incorporate your school's DNA into the application. As E-Gurukool is unlimited in its scope of customizability and scalability, we promise to continue to deliver as your institute grows over time, be it years or decades.

The online advantage:

Our online application enables staff, students and parents around the world to edit or access information from anywhere and at anytime.

Key features:

- Completely configurable and customizable
- Covers all academic / administrative tasks
- Configurable school structure
- Different rights for different users
- Information easily accessible and communicable to parents
